Dear Residents & Families:

As many of you are aware yesterday Dr. Strang announced the Sydney area has the beginning signs of community spread of Covid-19.

In response to this announcement the Cove Guest Home implemented universal pandemic precautions (UPP) which means the staff are now directed to wear both a mask and face/eye protection. UPP is basically applying droplet precautions to all direct resident contacts. Droplet transmission is the most common way for Covid-19 to spread.

Designated caregivers will be provided both a medical mask and face shield upon entering the Cove, both mask and face shield must remain on for the entire duration of your visit.

As always I wish to express our sincere thanks to you for your continued support as we work together to prevent the spread of Covid-19 into the Cove.

Please continue to;

- Wash your hands often.
- Stay home as much as possible.
- Keep up to date on potential exposure sites.
- Consider going for asymptomatic testing.
- Consider taking a vaccine if you have not already done so.
- If you are sick, stay home and call 811 for further instructions.
- Do not gather with others until permitted to do so by Public Health.

Like you, we are all becoming Covid tired but we must remain vigilant, the end goal is within reach.

Best always,

Cheryl Deveaux RN, BScN, MHS:L, MBA
CEO / Administrator
